

Topic:	Animals including humans	Year: 5		Strand: Biology	
What should I already know?		What will I know by the end of the unit?			
 Animals can be grouped into vertebrates (and then further into fish, reptiles, amphibians, birds and mammals). Some examples of life cycles (including those of plants and humans) Reproduction and growth are two of the seven life processes. How to live a healthy lifestyle. 		What are the main stages of the human life cycle?	foetus - an unborn animal or human being in the very early stages of development newborn - this is a baby that has just been born.		
	Vocabulary	1			
adolescence adulthood	the period of your life in which you develop from being a child into being an adult the state of being an adult			period of rapid change. earn to walk and talk at this	
development	the gradual growth or formation of something		childhood - child	ren learn new things as	
foetus	an animal or human being in its later stages of development before it is born		childhood - children learn new things as they grow. They become more independent .		
genitals	the reproductive organs	41			
gestation	the process in which babies grow inside their mother's body before they are born			is is when the body starts epare itself for adulthood.	
growth	an increase in something			es take place over a few	
hormones	a chemical, usually occurring naturally in your body, that makes an organ of your body do something) known as puberty.	
independent	If someone is independent , they do not need help or money from anyone else.		early adulthood - this is when humans are usually at their fittest and strongest.		
infancy	the period of your life when you are a very young child			d - changes such as hair	
life cycle	the series of changes that an animal or plant passes through from the beginning of its life until its death		loss may happen. There are also some hormonal changes again and the ability to reproduce decreases.		
life	There are seven processes that tell us that living				
processes mature	things are alive When a child or young animal matures , it becomes an adult		late adulthood - there is a decline in fitness and strength.		
menopause	the time during which a woman gradually stops menstruating, usually when she is about fifty years old	What is puberty?	late childhood a body starts to c	change that happens in and adolescence where the hange because of	
menstruation	the approximately monthly discharge of blood by non-pregnant women from puberty to the menopause		_	nclude growth in height, ir growth on arms and	
offspring	a person's children or an animal's young]	-	armpits and on genitals,	
organ	a part of your body that has a particular purpose	41		parts of the body such as	
puberty	the stage in someone's life when their body starts to become physically mature		male genitals an • Females begin t		
rapid	A rapid change is one that happens very quickly	·			
reproduction	when an animal or plant produces one or more individuals similar to itself		()		
toddler	a young child who has only just learned to walk	_]	hab		

Investigate!

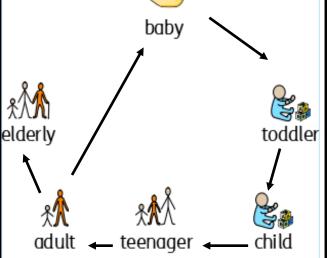

• Research the **gestation** periods of other animals and comparing them with humans

a creature which has a spine

- Collect data around school about height and hand span of different age ranges of pupils. Record the mean, mode and median height of pupils of different ages. Create a graph summarising results.
- Create a life story for a fictitious adult that has made healthy life choices.
- Compare the growth pattern of humans to other animals.

vertebrate

- Consider why humans take so long to learn to walk in comparison to other animals.
- Create a Venn diagram to show what the similarities and differences are between children, adolescents and adults.

Topic: Animals including humans			ear: 5	Strand: Biology		
Question 1: Place these in order in which they happen using numbers 1-4.	Start of unit:	End of unit:	Question 2: Which life process happens when adults produce offspring?		Start of unit:	End of unit:
adolescent			growth			
newborn			reproduct	ion		
adulthood			movemer	nt		
toddler			nutrition			

Question 3: Write one thing in each section to make this Venn diagram true.	Start of unit:	End of unit:
infant adolescent adolescent adult		

Question 4: Name three things that happen during puberty.	Start of unit:	End of unit:	Question 5: Name a time in a human's life when there is rapid change. Give an example of something that happens during that time.	Start of unit:	End of unit:
